

MOSAIC TILE ART PROGRAM FOR HIGH SCHOOLS

LET'S GO TO YOUR SCHOOL AND INSTALL A MOSAIC!

Workshop Objective

We consider that it is very important to direct or introduce youth to different professions and increase their own interests. Craft & Trade Academy wants to present the Juniors & Seniors in High Schools with the tile industry and craft. In this program, students will work in collaboration with the Academy to create a mosaic artistic intervention.

Workshop Overview

Craft & Trade Academy wants to give the students from Mecklenburg High Schools the opportunity to create and design their own mosaic artistic intervention, challenging their skills and creative talents. Students from High Schools working in collaboration with the Academy, can activate a space with art and communicate their vision, values, and creativity with tiles. They will have to design a project, create a mock-up, and install the mosaic.

Expected Outcomes

The tile art program for High Schools provides the opportunity for students to get to know the Craft & Trade Academy and the tile industry as possible career path. It benefits all stakeholders in the following ways:

- Students will have an experience in the trade of tiling based on the German model.
- All the students involved in the project will gain an understanding of tile, art with mosaics skills, and creative talents.
- The project will empower the students by giving them an opportunity to change a space and leave a long-term message on the school installation.
- Students will learn a different way of self-expression, and they will gain recognition from the community for their work.
- Students will increase their social skills by working together in collaboration with Craft & Trade students.
- Positive experience for the students in community involvement.
